AD629
Diagnostic Audiometer

The true hybrid
– Stand alone & PC-based audiometry in one box
The AD629 presents a new concept we like to call ‘hybrid’, because it combines the best of past, present and future in a compact and classic design. It combines the best features of our AD229 and brings it to a new level with modern PC integration.

Integrated functionality
The AD629 has the familiar feel of a standalone audiometer but offers features usually restricted to PC platforms such as EMR integration, multiple data/patient storage features, reporting tools and integration with other database programs (NOAH, OtoAccess™).

Familiarity + functional design
The ergonomic design of the AD629 is exceptional with an articulating, high-resolution 5.7 inch/14.5 cm color display that presents crystal clear images for easy to read audiograms. Several display choices are available to customize the readout to your personal preference. The familiar keypad design will enable users to acclimate quickly without losing efficiency or speed.

Superior versatility
The AD629 is small for portability, yet presents a high professional image in any environment. The power of the internal processor provides PC-like functionality without the PC! Upload multiple patient data into the AD629 before taking it on the road, then store test results to each specific client and download the information when you get back to the office to the database program of your choice (NOAH, OtoAccess™).

Support for multiple users
Define multiple user test protocols on the fly. Makes it easy and convenient for several users to share the same instrument in a clinic without having to change settings every day. Saves time and creates a optimal workflow.
Tradition and innovation

Tradition blended with innovation
The AD629 provides all of the traditional testing capabilities of a diagnostic audiometer but now blends additional measures and features to make your life simpler and more efficient. Built-in wavefiles for a variety of speech evaluations – including QuickSin, extended high frequency evaluation, PTA calculations and more. Hardware for efficient patient communication interaction is provided for sound room applications.

The AD629 – your dependable partner

• MEASURE using an intuitive and time tested user interface
• VIEW results on the crystal clear color display
• STORE data in multiple data sources
• COUNSEL patients
• SHARE data with others using reporting tools
The diagnostic test battery

AD629e provides all the necessary air, bone and masking features required for basic or advanced diagnostic and clinical use. The built-in high resolution color display offers dedicated test screens as well and many display and test options.

Tone audiometry

- Automatic CPT and PTA calculation
- User defined symbol scheme
- Speech banana
- Easy access to main functions

Tone audiometry test features
- Air conduction (HL, MCL & UCL)
- Bone conduction
- Pure Tone Stenger
- PTA and/or CPT calculation
- Define special audiometry symbols
- Easily switch to 1, 2 or 5dB steps
- Display masking information
- Speech banana

Other available tests
- Master Hearing Aid
- SISI
- Auto HL (Modified Hughson-Westlake)
- ABLB
- Bekesy
- High Frequency to 20,000 Hz (optional)
Speech audiometry

Choose between graph or table mode

Built-in wavefiles

Built-in media player for playing prerecorded speech material

Speech audiometry test features

- Live Voice, CD/MP3 or Wavefile presentations
- SRT, Word Recognition, MCL, UCL
- Recorded Word Recognition Scoring
- Binaural speech for CAPD applications
- Speech Stenger
- Built-in Wavefiles (optional)
- QuickSin™ (optional)
The true hybrid - overview

- Large color display
  5.7”/14.5 cm adjustable high resolution graphical color display
- 2 Channel tone and speech testing with dedicated test screens
- Multiple user settings
  (Protocols)
- Fully customizable
  Via user friendly setups
- Integrated recorded speech material
- Two way patient communication
- High Frequency option
  (20,000 Hz)
- Built-in power supply

AD629
Diagnostic Audiometer
The true hybrid - overview

- Customized printing and reporting
  Via the print wizard
- Dedicated special tests:
  - Hughson WestLake
  - Bekesy
  - ABLB
  - SISI
  - Langenbeck
  - Master Hearing Aid
- Direct print
  Support for direct print
- Patient / session storage
  Internal storage for 500 patients/50,000 test sessions. Historical audiogram view and print
- Compact and portable design
  Perfect for both portable and stationary use
- Familiar & intuitive button layout

Full PC and EMR interface
Two-way PC-control via the Diagnostic Suite software

35 cm / 14 inch.

29 cm / 11 inch.
Printing and reporting

Printing and reporting with ‘Print Wizard’
- Unlimited customizable reports
- Combine diagnostic data (Audiometry/Impedance and more)
- EMR and 3rd Party integration via PDF, XML or GDT formats
- Merge written information from imbedded report writer

Data storage
The Interacoustics Suites are designed to integrate data through NOAH or our own proprietary OtoAccess™ database. In addition, all instruments may be run in ‘stand-alone’ mode and then integrating data via PDF to EMR.

Platforms for the future
Interacoustics ‘Suite Software’ concept provides a dynamic core for all future instrumentation design, where instrument integration and upgrades will continue for years to come.

Direct printout via printer connected to the AD629

Merge and configure input from different sources in the Print Wizard
Design your own reports

- Retrieve patient demographics from OtoAccess™ and NOAH
- Merge audiometric and impedance test data on a single page
- Text field for session observations and conclusions
- Individual session dates
- Insert bitmaps such as clinic logo
- Highly configurable symbols for quick reference

Printout via Diagnostic Suite software and the print wizard
Popular combinations

Interacoustics provide a comprehensive software based solution for audiolologic diagnostics and hearing aid fitting. Through our intuitive and easy to use software suites the AD629 can easily be combined and integrated with our other instruments.

The Interacoustics Suites integrate various measurement modules in a common yet intuitive and user friendly way to enable viewing, storing and printing of shared data.

Diagnostic Suite supports all stand alone audiometers and tympanometers: AS608/AS608e, AD226, AD229b/AD229e, AD629, AC33, AC40, MT10, AT235/AT235h, AA222/AA222h.

Interacoustics – the wise choice
With over 40 years of experience, Interacoustics is dedicated to supplying its customers with the best possible solutions for their audiologic needs. This is accomplished by maintaining a continuous dialogue with healthcare professionals working in all sectors of audiology. Our equipment meets the highest possible engineering standards and we provide design expertise that can only come from close contact with clinical practice.

Solutions on every scale
Designing equipment for every size of clinic in so many countries puts us in the unique position of being able to offer solutions that fit your requirements exactly. Audiometry, tympanometry, electrophysiology, hearing aid testing, balance investigation are all within our scope and can be integrated to suit your needs.

Designed for diagnostics efficiency
We design equipment to make testing and interpretation easier. This means better interfaces, well designed screen layouts, printed reports and interaction over networks with databases and electronic records systems. In most cases, you can configure the settings and layout yourself.

Support worldwide
The Interacoustics name is not only your guarantee of quality and functionality, but also for support. We operate in over 100 countries worldwide through a well coordinated network of distributors and service centres to ensure that you receive total support and service.
